Chip, Kristine,

In accordance with our agreement on the informal dispute process, the LWG is providing a list of key technical issues that are necessary to resolve in order to develop a final Baseline Human Health Risk Assessment for the Portland Harbor Superfund Site. The key issues are segregated into two tables, as explained in the attached cover letter. In general, the two tables present the issues as follows:

- Table 1 represents the priority issues that will require discussion with EPA during our upcoming technical meetings (August 22 and 27);
- Table 2 presents other key issues along with specific recommended resolutions. If EPA does not agree with a particular suggested resolution then this issue can be added to the agenda for discussion during our upcoming technical meetings.

Please let us know if you have any questions.

Thank you,
Jen Woronets ☺
